

# THE CRYSTAL RECORDS

## September Arrivals

New to the Dynamic Energy Crystals family is 4th generation Sausalito native, Carrie Souza. Carrie comes to us with a background in marketing coupled with a deep love for crystals and minerals. During COVID-19 Carrie donated her time to help increase social media engagement and expand Dynamic Energy Crystals’s online presence to new audiences and customers. Carrie and Luz Elena host information filled live sale events on Instagram every other Friday & you can join in the fun by following @23magick on IG! If you’re feeling more adventurous, please grab your mask & drop by the store to meet Carrie in person on Thursdays for some socially distanced socializing! Welcome!

### COVID19 Checklist

1. Hand Sanitizer

---

2. Face Covering

---

3. Social Distancing

---

4. Four person in store maximum

This month we are excited to announce that we are carrying brand new moldavite specimens as part of our Moldavite Power collection that also includes Moldavite

incense, oil, and pendants. This mineral is a personal favorite of gallery owner Luz Elena. She says, “Wearing moldavite elevates my consciousness and gives me lucid dreams.” Moldavite is a very powerful and high vibration kind stone. It belongs to a rare family of minerals known as tektites that are formed in

the intense heat and pressure of meteorite impacts. Moldavite was formed millions of years ago when a large meteoroid landed in what is now the Czech Republic. Moldavite is unique among tektites because of its glassy clarity and unique green color.

### Regarding the Pandemic

The crystal gallery remains open every day from 10:30 - 6pm. We are taking measures to ensure the safety of our customers, and would like to once again remind our clients and customers that upon entering the gallery you are required to sanitize your hands, wear a face covering that fully covers your nose and mouth, and maintain a minimum distance of six feet between yourself and others. We are only allowing four people in the gallery at any given time (excluding our staff), and ask that upon checkout you address our staff from in front of the acrylic partition that we have placed on the counter.

We thank you for observing these measures, and recommend that you continue wearing a mask whenever you're in public to limit the spread of COVID19.

### Mineral of the Month: Tangerose Crystals

Tangerose crystals are treasured for their ability to activate passion and awaken universal, unconditional love within the heart. Tangerose crystals have a luminous pink color enhanced with an orange blush. Many have multiple record keeper triangles on one or more faces, distinctive metaphysical features, and unique etched forms or tiny seed crystals that often cover one or more sides. Most have inclusions and beautiful rainbows, and all possess a very positive, loving, and life affirming vibration. Their gentle power is perfect for healing and inner work, and they are wonderful to carry as personal crystals

**New for September:** Moldavite Specimens & Crystal Wisdom posts on Instagram

(Above) A Tangerose crystal specimen of moderate size. The luminous pink color you observe is caused by trace amounts of iron existing within the crystal itself.
