

THE CRYSTAL RECORDS

ALL NEW MATERIAL
FROM THE
TUCSON
GEM & MINERAL SHOW

Our Trip To Tucson

Earlier this month Luz's son Martine traveled to the Tucson Gem & Mineral Show and brought back over a hundred kilograms of new material that we are nearly done organizing!

New to the Gallery

Here are a few of the new and special items that we're excited to be carrying:

Azurite

We've had Azurite before, but never in Matrix or in Barite. Its radiant deep blue color moves subconscious thoughts into conscious awareness, clearing the mind and soul, and replacing obsolete or limiting beliefs, patterns, and behaviors with true understanding.

Bumblebee Jasper

First discovered in the opening of an Indonesian volcano, but also found in Australia, this brilliantly colored Sacral Chakra healer encourages total honesty with yourself. It is a great stone for getting work done and encourages the "pollination" of new projects. It represents triumph over the impossible and is thought to aid the processes of the nervous and circulatory systems. Can contain up to 30 minerals, including Calcite, Pyrite, Hematite, Manganese Oxide, & Fossilized Volcanic Ash.

Mangano "Pink" Calcite

Is a heart healing stone of forgiveness that helps us move on from unresolved traumas & pains. Also known as Pink Calcite, Mangano Calcite has a soft and comforting angelic energy that promotes inner peace, pure love, compassion, joy, and personal healing. It is an excellent stone for lifting tension and relieving anxiety. It can prevent nightmares when placed under a pillow. True Mangano Calcite contains manganese, a trace mineral that contributes to many bodily functions. Our Mangano Calcite comes to us from Peru.

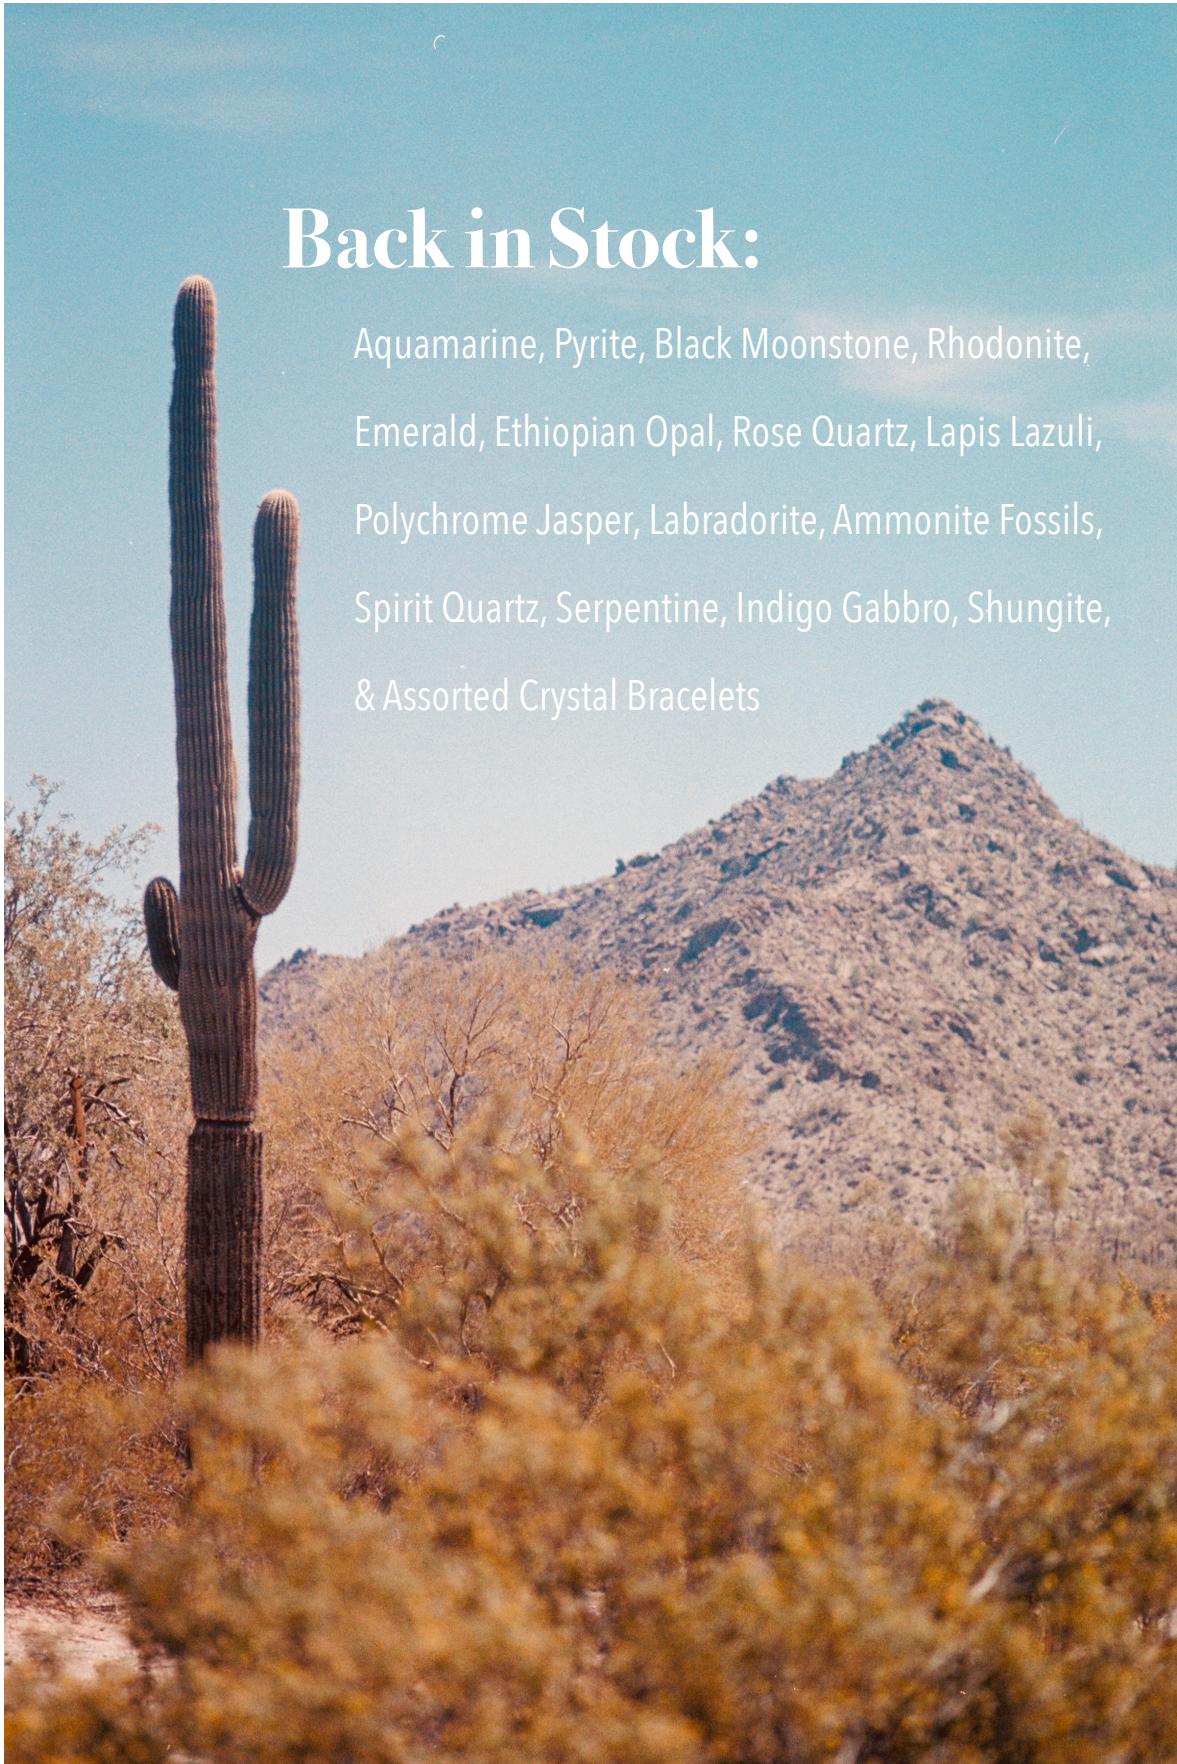

Ocean Jasper:

Free forms, Tumblers, Bowls & Hearts from Madagascar

Never have we had such a variety and quantity of premium Ocean Jasper in the gallery. We've hand selected a few beautiful large pieces of Ocean Jasper along with an assortment of small tumblers, bowls, and hearts that we are excited to be carrying.

Calling humanity to the shores, Ocean Jasper carries the rhythmic cadence of the sea, asking us to lay our burdens aside. Ocean Jasper works deeply and consciously to attune us physically and spiritually to the element of water.

Back in Stock:

Aquamarine, Pyrite, Black Moonstone, Rhodonite,
Emerald, Ethiopian Opal, Rose Quartz, Lapis Lazuli,
Polychrome Jasper, Labradorite, Ammonite Fossils,
Spirit Quartz, Serpentine, Indigo Gabbro, Shungite,
& Assorted Crystal Bracelets

Vanadinite

Belongs to the Apatite group of minerals. It has a strong connection to the earth chakra, grounding the soul into the physical body. It supports the respiratory system and is useful for breathing difficulties. As an aid to meditation, Vanadinite can help us quiet our minds or consciously direct our awareness for psychic vision and journeying. It also assists in defining and pursuing goals. Vanadinite can help curb overspending when placed in the wealth corner of a home.

With these new additions we can confidently say that we have never before had such a large and diverse selection of material in our gallery! We had a great time in Tucson reconnecting with all of our suppliers & making new connections along the way. We are so grateful to already be receiving tons of positive feedback on our new material and look forward to a summer's worth of crystals & happiness.
