New Crystals, Minerals & Jewelry!

Bumblebee Jasper

Azurite & Chrysocolla

Cobalto Calcite

New Zealand Jade

Polychrome Jasper
from Madagascar

Montana Agate

Sheen Obsidian

Tourmaline in Quartz

Spooky Skulls

Persian Turquoise

Welcome back to our Newsletter!

We've been very busy sorting through all of the amazing new material that arrived in September. This includes several varieties of crystals, gems, minerals and jewelry, such as the previously pictured pendants, that we've never carried before!

White Calcite Clouds

We are delighted to have a group of these beautiful White Calcite specimens in for the first time. They come from Morocco and look like puffy white clouds!

White Calcite is a stone of new beginnings. It restores motivation and accelerates growth and development. It also helps dissolve

pain, lower blood pressure, and can be used for healing past life situations.

Cubic Pyrite in Matrix

We've had cubic pyrite from Navajún, Spain before, but never in matrix like this! Pyrite is made out of one iron and two sulfur molecules, which is why it can naturally form in cubes. Another fun fact is that the name pyrite comes from the Greek phrase *pyrites lithos* that means "the stone which strikes fire" because it will create sparks if it is hit against metal or a rock.

Metaphysically, pyrite is known for attracting wealth and abundance. It is also a powerful protection stone against physical dangers and negative vibrations.

Zeolites

Zeolites have also made a return to our gallery! Zeolites are named after the Greek words *zeo* and *lithos* which translate to "boiling stone." This is because a Swedish mineralogist and chemist named Baron Axel Fredrik Cronstedt discovered that natural zeolites can produce steam when heated up because of their porous nature and high quantity of water molecules. The term zeolite usually refers to a family of crystals & minerals rather than just one. Our new collection of Zeolite minerals comes to us from India and includes Apophyllite, Stilbite, and Heulandite.

Clear Calcite

We know what you're thinking... More calcite?! As you may know, we carry many colors of Calcite such as Blue, Green, Orange, and Pink. This all new variety, however, is unique in its clarity. Many pieces have beautiful rainbows, frosty inclusions, and some (like the one pictured below) look remarkably like melting pieces of ice!

Clear Calcite also has powerful curative and detoxifying properties. It can be used to cleanse and align all seven Chakras. Clear calcite pieces that feature rainbow inclusions can invite great change and nurture new beginnings in your life.

Some fun facts about calcite:

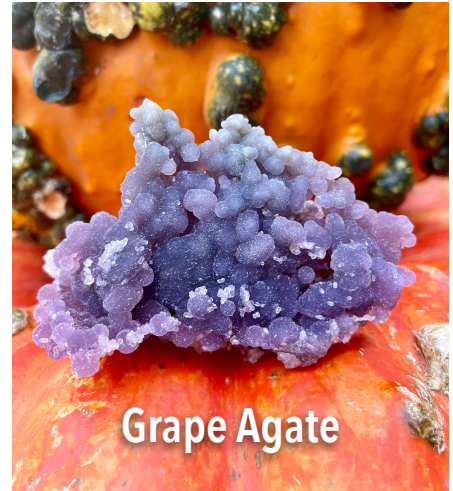

1. Clear calcite is doubly refractive. This means that if you place it over one line of text, you will see two lines of text reflected back!
2. The shells of most marine organisms contain calcite.
3. Water often contains calcite.

Rhodonite

Is now available in spheres, hearts and palm stone shapes! Rhodonite helps transform compassionate feelings into actions. Our Rhodonite comes from Peru.

Introducing something new & truly special...

Colombian Mochilas & Artisanal Creations

Earlier this year gallery owner Luz Elena returned from a trip to her home country of Colombia, where these handcrafted goods are from, and decided to embark upon a new and exciting adventure: honoring her heritage and expanding our horizons by making these beautiful creations available to our clients.

We are proud to announce that Luz's adventure was a resounding success! Each item you see is unique and was hand woven by women belonging to several of Colombia's indigenous groups. Every purchase supports programs that bring food & weaving supplies to these women, improving their quality of life by helping them feed their children & earn a fair wage.

That's All for Now!

Thank you so much for supporting our small business. We love each and every one of you!

- Luz Elena & the Dynamic Energy Crystals Team
